

10th Congress of

The International Federation for Heat Treatment and Surface Engineering

1-5 September 1996 The Brighton Centre, Brighton, UK

Incorporating the 3rd ASM Heat Treatment and Surface Engineering Conference in  
Europe

Organised by the Institute of Materials

10th Congress of the

International Federation for Heat Treatment and Surface Engineering

1-5 September 1996 the Brighton Centre Brighton, UK

The 1996 IFHT congress incorporates the third ASM Heat Treatment and Surface Engineering Conference in Europe. The event is organised and managed on behalf of IFHT by the institute of materials, London. IFHT and the organisers also acknowledge the generous support of Bodycote international plc.

**ORGANISING AND SCIENTIFIC COMMITTEE**

**WH ROBERTS** Congress chairman

**T BELL** University of Birmingham

**WT COOK** British Steel Technical, Swinden Technology Centre

**EJ MITTEMEIJER** Delft University of Technology

**RN TURNER** Tecvac Ltd

**RB WOOD** Secretary, IFHT

**INTERNATIONAL ADVISORY COMMITTEE**

**PROFESSOR J AGREN** Royal Institute of Technology, Sweden

**PROFESSOR T KONKOLY** Technical University of Budapest, Hungary

**PROFESSOR G KRAUSS** Colorado School of Mines, USA

**PROFESSOR TC LEI** Harbin Institute of Technology, China

**PROFESSOR P MAYR** Institute for Materials Technology, Bremen, Germany

**PROFESSOR BL MORDIKE** Technical University of Clausthal, Germany

**PROFESSOR S UEDA** Heat Treatment Society, Japan

**U WYSS** Honorary Life President, IFHT, Switzerland

**THIS BOOKLET INCLUDES ABSTRACTS OF PRESENTATIONS AVAILABLE AT TIME OF PRINT**

## FINAL PROGRAMME AND CONTENTS

### MONDAY 2 SEPTEMBER 1996

09.00 Registration

10.00 Coffee

10.30 Congress Opening Ceremony

**Opening Statement by Congress Chairman: Dr WH Roberts**

**Welcome Address by IFHT President: Professor P Mayr,  
Stiftung Institut für Werkstofftechnik, Bremen, Germany**

11.00 The 12th Harold Moore Memorial Lecture

**"The Performance of Tempered Martensite"**

**Professor G Krauss - John Henry Moore Professor, Colorado School of Mines, USA**

..... 1

12.00 Lunch

#### **PARALLEL SESSION 1A: Carburizing**

Session Chairman: WT Cook (British Steel Technical, Swinden Technology Centre, UK)

**14.00 Parameters, Uniformity and Trends in Plasma Carburizing**

F Hoffmann, S Dorn and P Mayr (Stiftung Institut für Werkstofftechnik, Germany)

..... 3

**14.20 Plasmacarburizing Furnaces in European Industry**

W Gräfen (Ipsen Industries International GmbH, Germany)

..... 5

**14.40 Vacuum Carburizing with High Pressure Gas Quenching - An Application for  
the Future**

P Heilmann (ALD Vacuum Technologies GmbH, Germany)

..... 7

**15.00 Carburizing: Theoretical Approach and Experimental Anticipation**

I Montevicchi (Bioteco, Italy)

..... 9

15.20 Refreshment Break

**15.50 New Aspects and Observations in Fluidized Bed Carburizing**

JA Virta (VTT Manufacturing Technology, Finland)

..... 11

**16.10 Effect of Alloying Elements and Oxygen Potential on Equilibrium Carbon Content in Gas Carburizing**

N Murai (Sumitomo Metal Industries Ltd., Japan), T Tsumura (SMI TechnoAce Inc., Japan) and M Hasebe (Kyushu Institute of Technology, Japan) ..... 13

**16.30 Fatigue Behaviour of Case-Hardened Low Alloy Cr-Mo Steel**

MA Golozar, A Saatchi and MA Soltani (Isfahan University of Technology, Iran) ..... 15

16.50 Close of session

**PARALLEL SESSION 1B: High Energy Beam Surface Engineering**

Session Chairman: Professor BL Mordike (Technical University of Clausthal, Germany)

**14.00 Laser Transformation Hardening and Thermochemical Alloying**

BL Mordike (Technical University of Clausthal, Germany)

**14.30 Surface Modification of Maraging Tool Steels by CO<sub>2</sub> Laser**

B VerO, Z Kalazi, R Kohlheb, G Pap and S Takacs (Bay Zoltan Institute for Materials Science and Technology, Hungary) ..... 17

**14.50 Electron Beam Surface Treatment Technologies and Industrial Application**

R Zenker (ETC Elektronenstrahl-Technologie GmbH, Germany) ..... 19

**15.10 Phase Selection During Solidification of AISI 420 and AISI 440C Tool Steels**

R Colac<sup>o</sup> and R Vilar (Instituto Superior Técnico, Portugal) ..... 21

15.30 Refreshment Break

**15.50 Transformation Hardening by CO<sub>2</sub> Laser**

H Sakamoto, K Shibata and H Matsuyama (Nissan Motor Co., Ltd., Japan) ..... 23

**16.10 Laser and Combined Methods for Increasing Wear Resistance**

PJ Kikin, AI Pchelintsev and EE Rusin (Russian Academy of Sciences, Russia) ..... 25

**16.30 Laser Heat Treatment of 6-5-2 High Speed Steels of Different Production**

## **Methods**

P Jurci, (SVUM, Czech Republic), P Stolar (VSCHT, Czech Republic) and J Dlouhy (ASCR, Czech Republic)

16.50 Close of session

## **TUESDAY 3 SEPTEMBER 1996**

### **PARALLEL SESSION 2A: Ferrous Heat Treatment I**

Session Chairman: Or B Edenhofer (Ipsen Industries International GmbH, Germany)

#### **9.00 The Role of Sensors in Heat Treatment**

B Edenhofer (Ipsen Industries International GmbH, Germany)

..... 27

#### **9.30 CFD Modelling of Quench Tank Agitation**

DS MacKenzie (MacDonnell Douglas Aerospace, USA), GE Totten (Union Carbide Corporation, USA) and N Gopinath (Fluidtherm Technologies Ltd., India)

..... 29

#### **9.50 PAG Polymer Quenchants: Increasingly Viable Quench Oil Replacements**

ZH Ou (BRIMET, China), GE Totten and GM Webster (Union Carbide Corporation, USA)

..... 31

#### **10.10 Contribution to Numerical Estimation of Hardness Penetration Depth in Steel**

Specimens B Smoljan (The University of Rijeka, Croatia)

..... 33

#### **10.30 Recent Investigation on Bainite and Martensite Transformation Mechanism and Air-Cooled Bainitic Steels**

HS Fang, ZG Yang, JJ Wang and YK Zheng (Tsinghua University, P.R. China)

..... 35

10.50 Refreshment Break

#### **11.10 Modelling of Heat Treatment of Steels: From Concepts to Process Simulation**

S Denis and A Simon (Ecole des Mines de Nancy, France)

..... 37

#### **11.30 Comparative Analysis of Non-Isothermal Austenite Transformation**

R Kohlheb, G Buza, I Felde, B Vero (Bay Zoltan Institute for Materials Science and Technology, Hungary), T Reti (Banki Donat Polytechnic, Hungary) and M Gergely (SACIT Steel Advisory Centre, Budapest, Hungary)

..... 39

**11.50 Embrittlement of Steel 12Cr1MoV Due to Tempering**  
SW Sun, TC Lei, CH Tang (Harbin Institute of Technology, China) G You, X Wang and GL Chen (Harbin Boiler Co. Ltd., China)  
..... 41

**12.10 Bake-Hardening Effect in Semi-Killed Steel Sheets**  
T Toth (Dunaujvaros Polytechnic of Miskolc University, Hungary)  
..... 43

**12.30 Plastic-Destruction Analysis of Heat-Treated Steel**  
BA Prusakov (Bauman Moscow State Technical University, Russia) and  
AG Bratoukhin, (Moscow State Institute of Aviation, Russia)  
..... 45

12.50 Lunch

## **PARALLEL SESSION 2B: Coatings I**

**Session Chairman: Professor JW He (Xi'an Jiaotong University, China)**

**09.00 Evaluation on Mechanical Properties of Hard Coatings**  
JW He, NS Hu, KW Xu (Xi'an Jiaotong University, China), T Bell, Y Sun and A Bloyce (Birmingham University, UK)  
..... 47

**09.30 Nitrogen and Titanium Profiles of Plasma Immersion Ion Mixing Implanted Bearing Steels**  
Xia Lifang, Ma Xinxin and Sun Yue, (Harbin Institute of Technology, China)  
..... 49

**09.50 The Influence of Surface Treatments on the Lifetime of Forming Tools - Selection of Advanced Tool Materials by Comparative Tribotesting**  
AJ Huis in't Veld and E van der Heide (TNO-Institute of Industrial Technology, The Netherlands)  
..... 51

**10.10 The Influence of the Microstructure and Phase Composition on Properties of Multicomponent and Composite Borided Coatings**  
P Bielinski and T Wierzchon (Warsaw University of Technology, Poland)  
..... 53

**10.30 Properties and Structure of High-Speed Steel and of Stainless Steel Coatings Produced by Pulse Plasma Deposition**  
A Michalski, Ha Than Binh and G Powala (Warsaw University of Technology, Poland)

	.....	55
10.50 Refreshment Break		
<b>11.10 Biasing Voltage as a Tool for Diamond Nucleation and Growth Control in a Hot-Filament CVD Reactor</b>		
G Negrea, G Vermesan, V Iancau and D Nica (Technical University of Cluj-Napoca, Romania)	.....	57
<b>11.30 Chemical Vapor Deposition of Hard and Superhard Coatings onto Hardmetals by Use of Barrier Interlayer</b>		
IY Konyashin (Hard and Refractory Metals Institute, Russia)	.....	59
<b>11.50 Checking the Suitability of PVD Coatings for Metal Forming and Plastic Injection Moulding by Impact Testing at Elevated Temperatures</b>		
J Steinebrunner, T Emmerich, S Heck, I Munder (Furtwangen University, Germany) and R Steinbuch (Reutlingen Polytechnical University, Germany)	.....	61
<b>12.10 Deposition and Characterization of Cathode Sputtered Ti-Al-B-C-N-Coatings</b>		
I Munder, T Emmerich, S Heck and J Steinebrunner (Furtwangen University, Germany)	.....	63
12.30 Lunch		
<b>PARALLEL SESSION 3A: Nitriding (Ferrous)</b>		
Session Chairman: Professor EJ Mittemeijer (Delft University of Technology, The Netherlands)		
<b>14.00 Thermodynamics, Kinetics and Process Control of Nitriding</b>		
EJ Mittemeijer and MAJ Somers (Delft University of Technology, The Netherlands)	.....	65
<b>14.30 Modelling of Thermochemical Surface Treatments</b>		
J Agren (Royal Institute of Technology, Sweden)	.....	67
<b>14.50 The Use of Oxygen Probes for Nitriding Processes. Theory and Practice</b>		
R Hoffmann (IVA-Industriefen, Germany)	.....	69
<b>15.10 Effects of Nitriding Temperature on Gas Nitriding Property of Steels for</b>		

## **Nitriding**

N Ishikawa, T Shiraga and M Ishiguro (NKK Corporation, Japan), H Kabasawa (Nihon Techno Co. Ltd., Japan) Y Kuwahara (Nagaoka Denshi Ltd., Japan)  
..... 71

15.30 Refreshment Break

### **15.50 Development of a High-Pressure Nitriding Process Controlled by the Nitriding Potential**

M Jung, FT Hoffmann, P Mayr (Stiftung Institut für Werkstofftechnik, Germany) and P Minarski (ALD Vacuum Technologies GmbH, Germany)  
..... 73

### **16.10 Industrial Developments of Plasma Nitriding**

JP Lebrun (Nitruvid S.N.C., France)

### **16.30 Effect of Atmospheric Pre-Heating on Gas Nitriding Behaviour of Austenitic Stainless Steel**

H Sueyoshi, Y Nakamura, T Nishida (Kagoshima University, Japan) and K Hamaishi (Kagoshima Prefectural Institute of Industrial Technology, Japan)  
..... 75

### **16.50 Influences of Contamination on Gas Nitriding**

O Irretier, J Dong, H Klümper-Westkamp, B Haase, K Bauckhage (Institut für Werkstofftechnik, Germany) and C Naber (Nabertherm, Germany)  
..... 77

17,10 Close of session

## **PARALLEL SESSION 3B: Coatings II**

Session Chairman: Professor A Matthews (The University of Hull, UK)

### **14.00 Statistical Lifestyle Analysis of PVD Coated Tooling for Cold Forming Operations**

S Dowey and A Matthews (The University of Hull, UK)

### **14.30 Corrosion and Wear Response of Chromium Boride Coated 316L Austenitic Stainless Steel**

PA Dearnley (University of Leeds, UK), N Dortmann, H Weiss (University of Siegen, Germany) and KL Dahm (University of Auckland, New Zealand)  
..... 79

### **14.50 Growth Kinetics of Diffusion Layers Produced on Low-Carbon Steel by Means of the Vacuum Chromising Process**

EM Kasprzycka (Institute of Precision Mechanics, Poland)	81
<b>15.10 The Corrosion Behaviour and Microstructure of Thermal Spray Coatings</b> A Neville (Heriot-Watt University, UK) and T Hodgkiess (Glasgow University, UK)	83
15.30 Refreshment Break	
<b>15.50 Friction Coefficient for Wood in Contact with TiN (TiZr)N and ZrN</b> P Beer, S Miklaszewski, A Sokolowska (Warsaw Agricultural University, Poland)	85
<b>16.10 Structural Characterisation of Novel Ti-Cu Intermetallic Coatings</b> M Salehi and R Hosseini (Isfahan University of Technology, Iran)	87
<b>16.30 Development of "XTiC" Materials for Thermal Spray and Weld Overlay Technology</b> A Saidi (Isfahan University of Technology, Iran) JV Wood (University of Nottingham, UK) JLF Kellie and J Ellis (London and Scandinavian Metallurgical Co., UK)	89
16.50 Close of session	
<b>WEDNESDAY 4 SEPTEMBER 1996</b>	
<b>PARALLEL SESSION 4A: Nitrocarburizing and Nitriding</b>	
Session Chairman: Professor Z Kolozsvary (Plasmaterm SA, Romania)	
<b>09.30 A Few Considerations on Surface Engineering in Central and Eastern Europe at the End of the 20th Century</b> Z Kolozsvary (S.C. Plasmaterm S.A., Romania)	91
<b>10.00 Towards an Epsilon Mono-Phased Compound Layer on Plain Carbon Steels by Plasma Nitrocarburising</b> C Ruset (Institute for Physics and Technology of Radiation Devices, Romania), A Bloyce and T Bell (Wolfson Institute for Surface Engineering, UK)	93
<b>10.20 The Future of Molten Salt Processes for Surface Engineering</b> G Wahl and B Beckett (Degussa Ltd, UK)	95

10.40 Refreshment Break

**11.10 Plasma-Sulfnitriding Using a Subsidiary Cathode of MoS<sub>2</sub> Plate**

R Urao, SP Hong, K Terakado and M Takeuchi (Ibaraki University, Japan)

..... 97

**11.30 Nitrogen Plasma Immersion Ion Implantation of Pure Titanium and its Alloys**

C Blawert and BL Mordike (TU Clausthal, Germany)

..... 99

**11.50 Nitriding of Aluminium in an r.f.-plasma**

C Jarms, H-R Stock and P Mayr (Stiftung Institut für Werkstofftechnik, Germany)

..... 101

**12.10 Computer-controlled Gas Nitriding - A Viable Replacement for Carburizing**

A Nakonieczny, J Senatorski and J Tacikowski (Institute of Precision Mechanics, Poland),

G Tymowski and W Liliental (Nitrex Metal Inc., Canada)

..... 103

12.30 Lunch

**PARALLEL SESSION 4B: Ferrous Heat Treatment II**

Session Chairman: Professor TC Lei (Harbin Institute of Technology, China)

**09.00 A Thermodynamic Study of Martensitic Transformation in M+F Dual-Phase Steels**

TC Lei, XP Shen and J Zhang (Harbin Institute of Technology, P.R. China)

..... 105

**09.20 Diagnostic Case Study Analysis of Engineering Steels: A Stockholder's Role**

G Haywood (Macreadys, UK)

..... 107

**09.40 Contract Heat Treatment Provides ADI Breakthrough**

S Day (ADI Treatments Ltd., UK)

..... 109

**10.00 Research on the Operational Properties of Vacuum Heat Treated Steels**

IV Mihailov, IS Pencheva (Scientific Technical Union of Mechanical Engineering, Bulgaria)

**10.20 The Influence of Aluminium on the Prior Austenite Grain Size of Heat Treated 0.4-0.7%C Steel Strip**

BA Wade, PF Morris (British Steel plc., UK) and K Draper (British Steel Strip Products, UK)

	..... 111
10.40 Refreshment Break	
<b>11.00 The Effect of Aluminium, Nitrogen and Assessment Method on the Grain Coarsening Characteristics of Steel</b>	
RG Williams, GA Claxton and WT Cook (British Steel plc., UK)	..... 113
<b>11.20 Study of Isothermal Austenitization Kinetics in Hypoeutectoid Carbon Steels</b>	
G Maizza, D Dumitru, B de Benedetti (Politechnic of Torino, Italy)	..... 115
<b>11.40 Modelling of Austenite Formation During Rapid Heating</b>	
J ROdel and H-J Spies (Freiberg University of Mining and Technology, Germany)	..... 119
<b>12.00 Rapid Austenitizing as a Method of Martensitic Steels Toughening</b>	
I Dlouhy (Institute of Physics of Materials ASCR, Czech Republic), M Kouril (Technical University of Brno, Czech Republic) and P Stolar (University of Chemical Engineering, Czech Republic)	..... 121
<b>12.20 Computer Simulation of Recrystallization by Cellular Automata Technique</b>	
He Yizhu, Chen Dahong (East China Institute of Metallurgy, China), TC Lei (Harbin Institute of Technology, China) and Yu Liang (Beijing University, China)	..... 123
12.40 Lunch	
<b>SESSION 5: Surface Engineering Developments including Non-Ferrous Treatments</b>	
Session Chairman: Dr MH Jacobs (University of Birmingham, UK)	
<b>13.40 An Evaluation of the Microstructure and Properties of a HIP Nitrided <math>\gamma</math>-Based Titanium Aluminide</b>	
JC Bryar, MH Jacobs and MA Ashworth (University of Birmingham, UK)	..... 125
<b>14.10 Properties of Surface Layers on Titanium Alloy Produced by Thermo-Chemical Treatments Under Glow Discharge Conditions</b>	
T WierzchOn and A Fleszar (Warsaw University of Technology, Poland)	..... 127
<b>14.30 The Role of Gold Silicide in Gold-Silicon Alloy Die Bonding</b>	

AA Johnson (University of Louisville, USA)	129
<b>14.50 The Use of Non-Cryogenically Generated Nitrogen to Inhibit the Oxidation of Non-ferrous Materials During Heat Treatment</b> PF Stratton (BOC Gases, UK)	131
<b>15.10 Surface Engineering: Recent Developments in the Spanish Industry</b> RJ Rodriguez, AL Sanz and AM Medrano (Asociacion de la Industrie Navarra, Spain)	133
15.30 Refreshment Break	
<b>15.50 Mathematical Modelling of the Effects of Controlled Shot Peening</b> GJ Hammersley (Metal Improvement Co. Inc., UK)	135
<b>16.10 Combined Thermodynamic and Kinetic Computational Simulation of Heat Treatments: Precipitation of Metastable Phases in Al alloys</b> I Hurtado, B Meurer, L Lochte, J Dunnwald, P Spencer and D Neuschütz (RWTH-Aachen, Germany)	137
<b>16.30 Mechanical Properties of High Temperature Vacuum Brazed HSS on Construction Steel with Simultaneous Heat Treatment</b> V Leskovsek, D Kmetc and B Sustarsic (Institute of Metals and Technology, Slovenia)	139
<b>16.50 The Technology and Philosophy of the Modern Heat Treatment and Surface Engineering Sub-Contractor</b> M Hallas (Bodycote International plc) and B Birch (Bodycote (UK) Ltd)	141
17.10 Close of session followed by a Drinks Reception hosted by Bodycote plc	
<b>THURSDAY 5 SEPTEMBER 1996</b>	
<b>SESSION 6: Duplex Treatments</b>	
Session Chairman: Professor T Bell (University of Birmingham, UK)	
<b>09.00 The Principles and Mathematical Modelling of Duplex Surface Engineering</b> T Bell and Y Sun (University of Birmingham, UK)	143

<b>09 30 Study on the Compound Treatment of Plating Hard Chromium and Plasma Nitriding</b>	
JP Ge and W Zhang (Dalian Railway Institute, China)	
<b>09.50 Metallographic Investigations of Carbon and Nitrogen Implanted TiN Coatings</b>	
F Seidel, H-R Stock and P Mayr (Stiftung Institut für Werkstofftechnik, Germany)	145
<b>10.10 State of the Art of the Combined Surface Treatment: Plasma Nitriding and Hard Wear Resistant Coatings</b>	
C Quaeyhaegens, J D'Haen, LM Stals (Institute for Materials Research, Belgium) and M Van Stappen (WTCM, Belgium)	147
<b>10.30 Duplex Surface Engineering of Ti-6Al-4V Alloy - Combining Oxygen Diffusion Treatment with DLC Coating</b>	
H Dong, A Bloyce and T Bell (Wolfson Institute for Surface Engineering, UK)	
<b>10.50 Nitriding of Laser-Alloying Steel</b>	
OV Chudina (Moscow State Automobile Institute, Russia)	151
<b>11.10 Refreshment Break</b>	
<b>11.40 Production of Duplex Coatings Through Process Combination Thermal Spraying/Nitriding</b>	
MC Nestler (Sulzer Metco (Deutschland) GmbH, Germany) H-J Spies, K Herrmann (TU Bergakademie Freiberg, Germany)	153
<b>12 00 In-situ Duplex Treatments for Hardened and Tempered Alloy Steels and their Performance in Rolling and Sliding Wear</b>	
YC Wong and ED Doyle (Swinburne University of Technology, Australia) and PA Dearnley (University of Leeds, UK)	155
<b>12.20 IFHT Young Author Award Closing Remarks</b>	
<b>13.00 Close of Congress</b>	
<b>POSTER SESSION</b>	
<b>P1 Dynamic Observations of In-Situ Tensile Deformation for Medium Manganese Austenitic Steel</b>	

R Zhu (Shandong University of Technology, China) and T Lei (Harbin Institute of Technology, China)	157
<b>P2 New X-Ray Method of Surface Phase Analysis of Metallic Materials</b>	
V Tchernyi, N Kaltchuk and N Baturinskaya (National Academy of Sciences, Ukraine)	159
<b>P3 Phase Dispersibility in Annealed Steels as a Factor Changing their Mechanical Properties</b>	
K Pietrzak, A Wojciechowski (Motor Transport Institute, Poland) and A Karamara (Foundry Research Institute, Poland)	161
<b>P4 Aluminium Hadfield Steel "Toughness, Wear Resistance and Microstructure"</b>	
MA Golozar, F Jahan-Bakhsh, A Najafi-Zadeh (Isfahan University of Technology, Iran)	
<b>P5 Effect of Controlled Cooling Heat Treatment on the Microstructure and Properties of Common Carbon Steels</b>	
Z Sun, L Jiang (University of Mining and Technology, China)	163
<b>P6 Tempering of Low Carbon Martensitic Stainless Steels</b>	
B Badan, M Magrini, A Zambon, (University di Padova, Italy) P Pasqualotto (SAFAS, Italy)	165
<b>P7 Thick Coatings Deposition on Aluminium Alloy by CDS Process</b>	
B Badan, E Ramous, A Zambon (University di Padova, Italy) M Bianco (Istituto RTM, Italy)	167
<b>P8 Controlled Gas Nitriding - A Viable Replacement for Carburizing</b>	
J Tacikowski, J Senatorski (Institute of Precision Mechanics, Poland) G Tymowski, W Liliental (Nitrex Metal Inc., Canada)	
<b>P9 The Nature of Hardness of a Nitrided Layer</b>	
AP Gulyaev (Mashinostroenie, Russia)	169
<b>P10 Increasing Fatigue Strength and Tribological Properties of Nitrided Carbon Steels by Precipitation Hardening</b>	
J Tacikowski, A Nakonieczny, J Senatorski and T Babul (Institute of Precision Mechanics, Poland)	171

<b>P11 On Possibility to Form Fatigue Properties of 4140 steel by Nitriding and High-Temperature Tempering</b> A Nakonieczny, T Babul, J Tacikowski and T Burakowski (Institute of Precision Mechanics, Poland)	173
<b>P12 A New Way in Low Temperature Chemical Heat-Treatment</b> V Zinchenko, V Siropiatov, O Safonova and V Barelko (JS "NII Tavtoprom" and Institute of Chemical Physics, Russia)	175
<b>P13 Study on Carbonitriding of Steels at Temperatures in the range 700-750°C in NH<sub>3</sub>-CH<sub>4</sub> Atmosphere</b> V Iancau, D Nica and G Negrea (Technical University of Cluj-Napoca, Romania)	177
<b>P14 Application of the "Carbonit" -Process for Diffusion Hardening of Fe-based Alloys</b> R Russev, S Harizanova and E Rousseva (Technical University of Varna, Bulgaria)	179
<b>P15 Nitrooxidation of Ferrous Materials</b> R Russev, S Harizanova, S Malinov and P Petrov (Technical University of Varna, Bulgaria)	181
<b>P16 Effect of Prior Cold Deformation on Aluminizing Processes of a Low Carbon Steel</b> XC Meng, X Li (Jiamusi Institute of Technology, China) TC Lei (Harbin Institute of Technology, China)	183
<b>P17 Development of Method for Obtaining Brazed Joint of Cubic Boron Nitride with Base</b> I Pobol (National Academy of Sciences, Belarus) K Friedel and J Felba (Institute of Electron Technology, Poland)	187
<b>P18 Tribological Properties of Surface Graded Ti-Al Intermetallic Coatings</b> M Saleh and H Shaeilozadeh (Isfahan University of Technology, Iran)	189
<b>P19 Optimal Manufacturing Technology on the Gear</b> Q Xou (Wuhan Institute of Textile Science and Technology, China)	191

<b>P20 Tribological Evaluation of Fe-Al Intermetallic Compound Coated Low Alloy Structural Steels</b>	
M Salehi, F Ashrafzadeh and M Shamanian (Isfahan University of Technology, Iran)	
.....	193
<b>P21 Formation of Ni-Cr-Mo Alloy Layer on Surfaces of Common Carbon Steel by Xu-Tec Process</b>	
X Zhong, L Regina and X Yanfeng (Taiyuan University of Technology, China)	
.....	195
<b>P22 Modelling of the Layer Depth Evolution during Thermochemical Process</b>	
C Samoila, D Ursutiu and A Centea (Transylvania University of Brasov, Romania)	
.....	197
<b>P23 The Physical Principles of Microstructure Regulation by Melt Quenching as a Basis for Working Properties Improvement</b>	
AM Glezer (IP Bardin Central Research Institute of Ferrous Metallurgy, Russia)	
.....	199
<b>P24 Application of Computer Simulation in Heat Treating of Steels</b>	
I Felde, R Kohlheb, G Buza, B Vero (Bay Zoltan Institute of Material Sciences and Engineering, Hungary), T Rdti (Banki Donat Polytechnic, Hungary) and M Gergely (SACIT Steel Advisory Centre, Hungary)	
.....	201
<b>P25 Effective Application of Laser Beam in Metal Processing and Surface Treatment</b>	
H Golnabi (Sharif University of Technology, Iran)	
.....	203
<b>P26 About the Receiving of the Amorphous and Microcrystalline Alloys under the Laser Treatment</b>	
N Skripka, V Naydek and V Lihoshva (The Institute of Foundry Problems, Ukraine)	
.....	205
<b>P27 Microstructure of Laser Heat Treated Tool Steel OCR 12</b>	
S Spruk (Institute of Metals and Technologies, Slovenia), A Rodic and B Pracek (Institute of Surface Engineering and Optoelectronics, Slovenia)	
.....	207
<b>P28 The Heat Treatment of New High Strength Casting Aluminium Alloys</b>	
E Tagiev and S Holecek (Institute of Chemical Technology in Prague, Czech Republic)	
.....	209
<b>P29 Electron Beam Hardening of Metal Surface Without Subsequent Mechanical</b>	

## **Treatment**

AA Kajdalov (Incors Ltd., Ukraine)

### **P30 Combined Laser-Plasma Treatment of Fe-C Alloys**

AP Shatrava, VA Pereloma, VP Lihoshva, (The Institute of Foundry Problems, Ukraine)

..... 211

### **P31 The Heat Treatment and Aging Characteristic of Particulate Reinforced Metal Matrix Composites**

JH Shyong (Chung-Cheng Institute of Technology, Taiwan)

..... 213

### **P32 The Mabbutt Precision Steel Heat Treatment Processes**

D Mabbutt (Heat Treatment Consultant, UK)

..... 215

### **P33 A New Method for Low Temperature Gaseous Nitriding of Iron**

DK Inia, WM Arnoldbik, AM Vredenberg and DO Boerma (Utrecht University, The Netherlands)

..... 217

### **P34 Rapid Depth Profile Analysis of Heat Treated and Surface Engineered Materials Using Glow Discharge Optical Emission Spectroscopy (GDOES)**

M Ives (Sheffield Hallam University, UK)

..... 219

### **P35 Advances in Non-destructive Testing for Quality Monitoring of Heat-Treated Materials**

JJ Flynn (Foerster UK Ltd., UK)
