

2nd International conference on quenching and control of distortion – ICQCD
Cleveland OH, USA, 1996

Table Of Contents

Professor Imao Tamura Memorial Symposium

Overview of Prof. Imao Tamura's Contribution to the Field of Heat Treating	3
<i>K. Funatani, Nihon Parkerizing Co., Ltd., Nagoya, Japan</i> <i>G.E. Totten, Union Carbide Corp., Tarrytown, New York</i>	
Development of the Understanding of the Influence of Wetting Behavior on Quenching and the Merits in these Developments of Prof. Imao Tamura	17
<i>H.M. Tensi, Technical University of Munich, Munich, Germany</i> <i>G.E. Totten, Union Carbide Corp., Tarrytown, New York</i>	
Fundamentals about Characteristic Temperature and Convection Stage Start Temperature in Professor Imao Tamura's Investigations	29
<i>N.I. Kobasko, Engineering Thermophysics Institute of National Academy of Sciences, Kyiv, Ukraine</i>	
Recent Research on Cooling Power of Liquid Quenchants in Japan	37
<i>M. Narazaki, Utsunomiya University, Utsunomiya, Japan</i> <i>S. Asada, K. Fukahara, Nippon Grease Co., Ltd., Osaka, Japan</i>	
Inverse Hardness Distribution and Its Influence on Mechanical Properties	47
<i>B. Liščić, University of Zagreb, Zagreb, Croatia</i> <i>V. Grubisic, Fraunhofer-Institut für Betriebsfestigkeit (LBF), Darmstadt, Germany</i> <i>G.E. Totten, Union Carbide Corp., Tarrytown, New York</i>	
Simulation and Experimental Verification of Induction Hardening Process for Some Kinds of Steel	55
<i>T. Inoue, H. Inoue, T. Uehara, Kyoto University, Kyoto, Japan</i> <i>F. Ikuta, Neturen Co., Ltd., Kanagawa, Japan</i> <i>K. Arimoto, CRC Research Institute, Inc., Osaka, Japan</i> <i>T. Igari, Mitsubishi Heavy Industries, Ltd., Nagasaki, Japan</i>	
Computer Simulating of the Three-Dimensional Temperature Field of Quenching Process with Suddenly Changed Surface Condition	63
<i>H. Mingjuan, P. Jiansheng, T. Dong, Z. Weimin, Shanghai Jiaotong University, Shanghai, China</i>	
Cooling Conditions and Heat Transfer in Oil and High-Pressure Gas Quenching of Steel Components - An Overview	69
<i>S. Segerberg, J. Bodin, The Swedish Institute of Production Engineering Research, Mölndal, Sweden</i>	
Determination of Vapor Film Thickness During Immersion Cooling in Aqueous Polymer Solutions	75
<i>K. Lainer, H.M. Tensi, Technical University of Munich, Munich, Germany</i>	

2nd International conference on quenching and control of distortion – ICQCD
Cleveland OH, USA, 1996

Cooling Curve Analysis Hardenability Prediction

Calibration and Agitation In Quenching Tanks and - A Proposal to Catch the Agitation	85
<i>H.M. Tensi, Technical University of Munich, Munich, Germany</i> <i>G.E. Totten, Union Carbide Corp., Tarrytown, New York</i>	
Heat Transfer Coefficient and Heat Flux Density Distribution, Influenced by the Wetting Behavior of Hollow Cylinders	93
<i>K. Lainer, H.M. Tensi, Technical University of Munich, Munich, Germany</i>	
Laboratory Test of Cooling Power of Polymer Quenchants	101
<i>M. Narazaki, M. Kogawara, A. Shirayori, S. Fuchizawa, Utsunomiya University, Utsunomiya, Japan</i>	
Behavior Analysis of Quenching Ununiformity by JIS-Method Cooling Curve	111
<i>E. Nakamura, H. Uchida, S. Koyama, Idemitsu Kousan Co., Ltd., Chiba, Japan</i>	
Quenchants Characterization by Acoustical Noise Analysis of Cooling Properties of Aqueous Poly (Alkylene Glycol) Polymer Quenchants	117
<i>A.A. Moskalenko, N.I. Kobasko, O.V. Tolmacheva, Engineering Thermophysics Institute of National Academy of Sciences, Kyiv, Ukraine</i> <i>G.E. Totten, G.M. Webster, Union Carbide Corp., Tarrytown, New York</i>	
A Hardenability Test Proposal	123
<i>N.V.S.N. Murthy, Ingersoll-Rand (I) Ltd., Bangalore, India</i>	

Distortion

Relative Effects of Case Hardening Parameters on Distortion Occurring During Carburizing and Quenching	135
<i>D.L. Milam, The Timken Company, Canton, Ohio</i>	
Understanding and Controlling Distortion in Large Bearing Rings-Some Practical Aspects	143
<i>H.W. Walton, The Torrington Company, Rutherfordton, North Carolina</i>	
Control of Quench Distortion for Steel Parts	149
<i>S. Owaku, The Japan Society for Heat Treatment, Tokyo, Japan</i>	

Gas Quenching

High Pressure Gas Quenching-Technical and Economical Considerations	157
<i>S.J. Midea, AGA Gas, Inc., Cleveland, Ohio</i> <i>T. Holm, AGA AB, Lidinago, Sweden</i> <i>S. Segerberg, J. Bodin, IVF, Goteberg, Sweden</i> <i>T. Thors, K. Swärtstrom, Volvo Car Components, Goteborg, Sweden</i>	
High-Pressure Gas Quenching in Cold Chambers for Increased Cooling Capacity	165
<i>S. Segerberg, E. Troell, The Swedish Institute of Production Engineering Research, Mölndal, Sweden</i>	
Distortion at CVD-Coating and Gas Quenched Tool Steels	171
<i>O.Kessler, F. Hoffmann, P. Mayr, Stiftung Institut für Werkstofftechnik, Bremen, Germany</i>	

Laser Hardening/Distortion

Measurement and Analysis of Residual Stresses After Laser Hardening and Laser Surface Melt-Hardening on Flat Specimens	181
<i>J. Grum, R. Sturm, P. Zerovnik, University of Ljubljana, Ljubljana, Slovenia</i>	
Characteristics of Laser Surface Melt-Hardening and Possibilities of Optimizing the Process	193
<i>J. Grum, R. Sturm, University of Ljubljana, Ljubljana, Slovenia</i>	

Measurement

Residual Stress Measurements in Forced Convective Quenched Steel Bars by Means of Neutron Diffraction	203
<i>B. Hernandez-Morales, B.E. Hawbolt, J.K. Brimacombe, University of British Columbia, Vancouver, British Columbia, Canada</i>	
<i>J.H. Root, AECL Research, Chalk River, Canada</i>	
On the Use of the Blind Hole Method to Control Stress-Relief Treatments	215
<i>J.T.P. Castro, J.L.F. Freire, Catholic University of Rio de Janeiro, Rio de Janeiro, Brazil</i>	
<i>R.D. Vieira, CEFET/RJ and StrainLab Stress Analysis Ltd., Rio de Janeiro, Brazil</i>	
Quantum Electrotopography (QETG) and the Visualization and Measurement of Distortion, Residual Stress, and Cracking Propensity in Processed Metals	221
<i>M. Ensanian, NMCARC, Eldred, Pennsylvania</i>	

Modeling Microstructure: Heat Transfer/Residual Stress/Distortion

Application of Heat Treatment Simulation in Production Environment	235
<i>T.E. Clements, L. Chuzhoy, Caterpillar Inc., Peoria, Illinois</i>	
<i>I. Shareef, Bradley University, Peoria, Illinois</i>	
Modeling of Heat Treatment of Steels: From Concepts to Process Simulation	239
<i>S. Denis, A. Simon, Ecole des Mines de Nancy, Nancy, France</i>	
Computer Simulation of Temperature and Thermal Stress Fields During Quenching Process	241
<i>X.L. Chen, L. Meekisho, Oregon Graduate Institute of Science and Technology, Portland, Oregon</i>	
Residual Stresses and Distortion of a Ring in Quenching-Tempering Process Based on Metallo-Thermo-Mechanics	249
<i>D.Y. Ju, Saitama Institute of Technology, Okabe, Japan</i>	
<i>M. Sahashi, T. Omori, T. Inoue, Kyoto University, Kyoto, Japan</i>	
Computer Simulation of Residual Stresses/Distortion and Structural Change in the Course of Scanning Induction Hardening	259
<i>F. Ikuta, Neturen Co., Ltd., Kanagawa, Japan</i>	
<i>K. Arimoto, CRC Research Institute, Inc., Osaka, Japan</i>	
<i>T. Inoue, Kyoto University, Kyoto, Japan</i>	

Modeling Microstructure: Heat Transfer/Residual Stress/Distortion, Continued

Experiments with One-Sided Spray-Cooling of Steel Plates for Evaluation of Thermo-Mechanical Material Models	267
<i>M. Oldenburg, G. Bergman, Luleå University of Technology, Luleå, Sweden</i>	
<i>L. Sandberg, M. Jonsson, Plannja HardTech AB, Luleå, Sweden</i>	
Application of Computer Models to the Determination of Heat Transfer Coefficients of UCON® Quenchant Solutions in Heat Treating Operations	275
<i>G. Sanchez-Sarmiento, Universidad de Buenos Aires, Buenos Aires, Argentina</i>	
<i>E. Mues, Union Carbide Argentina S.A.I.C.S., Buenos Aires, Argentina</i>	
<i>C. Bunte, Boker Arbolito S.A., Buenos Aires, Argentina</i>	
On a FEM Platform for Simulation of Quenching/Heat Treating Operations	283
<i>A.J. Baker, P.D. Manhardt, J.A. Orzechowski,</i>	
<i>University of Tennessee and Computational Mechanics Corp., Knoxville, Tennessee</i>	
Prediction of Hardness Variations in Quenching of Carbon Steel	291
<i>M. Tajima, Kanagawa University, Yokohama, Japan</i>	
Calculation of Distortion of Tool Steel Dies During Hardening	297
<i>A. Thuvander, Swedish Institute for Metals Research, Stockholm, Sweden</i>	
Numerical and Experimental Investigation of Quench Process	305
<i>C.H. Gür, A.E. Tekkaya, T. Öztürk, Middle East Technical University, Ankara, Turkey</i>	
Computer Modeling as a Predictive Tool for Heat Treating	315
<i>M.G. Palafox, R. Colás, Universidad Autónoma de Nuevo León,</i>	
<i>Cd. Universitaria, N.L., México</i>	
A Sensitivity Study of the Process Model for Predicting the Distortion During Heat Treating	321
<i>T.C. Tszeng, W.T. Wu, Scientific Forming Technologies Corp., Columbus, Ohio</i>	
<i>L. Semiatin, WL/MLLN, Wright-Patterson AFB, Ohio</i>	
Quenching Fundamentals: Heat Transfer	329
<i>D.S. MacKenzie, McDonnell Douglas Aerospace, St. Louis, Missouri</i>	
<i>G.E. Totten, G.M. Webster, Union Carbide Corp., Tarrytown, New York</i>	
Computer Simulation of Solidification Cracking in High Strength Aluminum Alloys: Basic Concepts and Approach	341
<i>K.-M. Chang, H.-M. Lu, J. Wan, West Virginia University, Morgantown, West Virginia</i>	
<i>J. F. Harris, Ravenswood Aluminum Co. Ravenswood, West Virginia</i>	

Process Modelling-NCMS Work

Development of a Carburizing and Quenching Simulation Tool: Program Overview 349

W. Dowling, Jr., Ford Motor Co., Dearborn, Michigan
T. Pattok, National Center for Manufacturing Sciences, Ann Arbor, Michigan
B.L. Ferguson, Deformation Control Technology, Inc., Cleveland, Ohio
D. Shick, The Torrington Company, Torrington, Connecticut
Y. Helen Gu, General Motors Corp., Romulus Michigan
M. Howes, IIT Research Center, Chicago, Illinois

Development of a Carburizing and Quenching Simulation Tool: Determination of Heat Transfer Boundary Conditions in Salt 357

D. Shick, The Torrington Co., Torrington, Connecticut
D. Chenoweth, Sandia National Laboratory, Livermore, California
N. Palle, C. Mack, W. Copple, Ford Motor Co., Dearborn, Michigan
W.-T. Lee, JPI Industrial Inc., Ann Arbor, Michigan
*W. Elliot, J. Park, G.M. Ludtka, R. Lenarduzzi, Oak Ridge National Laboratory,
Oak Ridge, Tennessee*
H. Walton, The Torrington Company, Rutherfordton, North Carolina
M. Howes, IIT Research Institute, Chicago, Illinois

Quenching Methods

Radius-Controlled Hardening of Bearing Rings in a Quenching Press	387
<i>T. Lübben, P. Mayr, F. Hoffmann, Stiftung Institut für Werkstofftechnik, Bremen, Germany</i>	
Reduced Pressure Quenching Oil and Distortion	395
<i>S. Asada, Nippon Grease Co., Ltd., Kobe, Japan</i> <i>M. Ogino, Toyota Motor Corp., Aichi, Japan</i>	
The Improvement of Distortion by High-Temperature Oil Quenching	401
<i>E. Nakamura, H. Uchida, S. Koyama, Idemitsu Kousan Co., Ltd., Chiba, Japan</i>	
Quenching Performance of Synthetic Phosphate Ester Oils as Determined by Cooling Curve Analysis	405
<i>D.G. Placek, FMC Corporation, Princeton, New Jersey</i>	
Coat Forming Quenching Oil and Distortion	413
<i>S. Asada, Nippon Grease Co., Ltd., Kobe, Japan</i>	
Influence of Salt Quench on Distortion	417
<i>G. Wahl, durferrit, GmbH Thermotechnik, Hanau, Germany</i>	
A New Quenching Alternative	423
<i>R.J. Brennan, C.H. Faulkner, Houghton International, Valley Forge, Pennsylvania</i>	
The State of the Art on Heat Treatment Quenching Technologies in China	429
<i>L. Dai, Beijing Research Institute of Mechanical and Electrical Technology, Beijing, China</i>	
Development of Immersion Quenching of Small Diameter Bars	433
<i>C. Bunte, ACINDAR S.A., Buenos Aires, Argentina</i>	
A Study of Polymer Quenching on Gears	437
<i>H.O. Zhao, Beijing Research Institute of Mechanical & Electrical Technology, Beijing, China</i> <i>T. Yi, Qiqihar Gear Factory, Qiqihar, China</i>	
Possibility of Quenching from Lower Temperatures Without Losing Quenchability	445
<i>J. Bárta, MSA, Dolní Benesov, Czech Republic</i> <i>I. Mika, SSAB, Czechia, Czech Republic</i> <i>M. Tvrdy, Vítkovice, Ostrava, Czech Republic</i>	
HIP Quenching-A Heat Treating Method	449
<i>F.X. Zimmerman, ABB Autoclave Systems Inc., Erie, Pennsylvania</i> <i>C. Bergman, ABB Pressure Systems AB, Vasteras, Sweden</i>	

Water - Gas and Spray Quenching

Cooling Capacity of Water-Gas Mixtures. Application to the Quenching of Carbon Steels ...	457
<i>F. Moreaux, CNRS, Nancy, France</i> <i>D. Forgeoux, SAM, Neuves Maisons, France</i> <i>M. Jallon, UNIMETAL, Amnéville, France</i>	
Quenching Using Air-Water Mixtures	463
<i>R.A. Wallis, Wyman-Gordon Forgings, Houston, Texas</i> <i>R. Garwood, J. Ward, University of Glamorgan, Pontypridd, United Kingdom</i> <i>Q. Xia, ABC Rail Products, Birmingham, Alabama</i>	
Validation of a Systematic Approach to Modeling Spray Quenching of Aluminum Alloy Extrusions, Composites, and Continuous Castings	473
<i>D. Hall, I. Mudawar, Purdue University, West Lafayette, Indiana</i> <i>R.E. Morgan, S.L. Ehlers, Naval Air Warfare Center, Indianapolis, Indiana</i>	

Poster Session

Neutron Scattering Residual Stress Measurements on Gray Cast Iron Brake Discs	491
<i>S. Spooner, E. A. Payzant, C. R. Hubbard, W. T. Donlon, G. M. Vyletel, Oak Ridge National Laboratory, Oak Ridge, Tennessee</i>	
Fluidized Bed Quenching Technology	495
<i>R. Reynoldson, Quality Heat Treatment Pty. Ltd., Melbourne, Australia</i>	
Influence of Probe and Its Cooling Behavior on Assessing Cooling Characteristics of Quenching	503
<i>X. Luo, H. Liu, Jiangsu University of Science & Technology, Zhenjiang, Jiangsu, P.R. China</i>	
Successful Use of Polymer Quenchants with Crack-Sensitive Steels	509
<i>G.M. Webster, G.E. Totten, Union Carbide Corp., Tarrytown, New York S.H. Kang, S.W. Han, Kum Won Industrial Co., Ltd., Chungnam, Korea</i>	
PAG Polymer Quenchants: Increasingly Viable Quench Oil Replacements	517
<i>H.O. Zhao, Beijing Research Institute of Mechanical and Electrical Technology, Beijing, China G.E. Totten, G.M. Webster, Y.H. Sun, Union Carbide Corp., Tarrytown, New York</i>	
Characterization of Thermally Separated Poly (Alkylene Glycol) Polymer Quenchants by ESR Spectroscopy	525
<i>D. McLeod Jr., Briarcliff Manor, New York G.E. Totten, G.M. Webster, Union Carbide Corp., Tarrytown, New York</i>	
The Heat Influence on the Crystal Lattice Defects and on the Substructure of Tungsten	535
<i>G.A. Beresnev, V.S. Postnikov, Perm State Technical University, Perm, Russia</i>	
The Microfagility of the Surface Layer After the Pulsed Laser Treatment	539
<i>V.S. Postnikov, Perm State Technical University, Perm, Russia</i>	
An Ultrasonic Technique of Quenching Stress Control in Steels and Alloys	543
<i>V.V. Muraviev, E.M. Sukharev, A.N. Kurbator, Siberian State Academy of Railways, Novosibirsk, Russia</i>	
Perspective Polymers Hardened Media for Aluminum Alloys and Steels	547
<i>A.S. Bedarev, V.V. Muraviev, Z.I. Yermolaeva, Siberian State Academy of Railways, Novosibirsk, Russia</i>	
Increasing Safe Life of Machine Parts by Means of Using Intensive Steel Quenching Method	551
<i>N.I. Kobasko, Engineering Thermophysics Institute of National Academy of Sciences, Kyiv, Ukraine A.S. Ryazanov, N.B. Platonova, Ferro Balt, St. Petersburg, Russia</i>	
Effect of Second Phase Morphology on Warm Stretch-Flangeability in High Strength TRIP-Aided Dual-Phase Steel Sheets	557
<i>A. Nagasaka, Nagano National College of Technology, Nagano, Japan K. Sugimoto, M. Kobayashi, Shinshu University, Nagano, Japan</i>	
New Test for Measuring Quench Effectiveness	565
<i>R.H. Gassner, CNS Engineering Inc., Fullerton, California</i>	

Poster Session, Continued

Cooling Characteristics of a PAG Polymer Quenchant and Its Application on Medium Carbon Steel	571
<i>R. Linggoputro, University of Indonesia, Kampus Baru II, Depok, Indonesia</i>	
Improved Heat Treating Through Change In Agitation and Quenchant	577
<i>W.R. Gritzmacher, M. Walter, TC Industries, Inc., Crystal Lake, Illinois</i>	
Cooling Curve Analysis - International and National Standard Development: A Status Report	585
<i>G.E. Totten, G.M. Webster, Union Carbide Corp., Tarrytown, New York</i>	
<i>H.M. Tensi, Technical University of Munich, Munich, Germany</i>	
<i>L.M. Jarvis, Tenaxol, Inc. Milwaukee, Wisconsin</i>	
Performance of Vegetable Oils as a Heat Treat Quenchant	595
<i>L.A.T. Honary, University of Northern Iowa, Waverly, Iowa</i>	
Determination of Quenching and Tempering Conditions Using Hardenability Prediction	607
<i>J. Oviedo, CRAFMSA, San Luis, Argentina</i>	
Continuous Heating, Varying Temperature Quenching Technic and Apparatus of the Variable Cross-Section Slender Rod with Loss Stress	613
<i>D. Yan, J. He, X. Li, M. Jing, Department of Material Science and Engineering, Hebei University of Technology, TianJin, P.R. China</i>	
A Simple Method and Its Application to Predict the Cooling Curve at the Quenching Steel Part's Center	617
<i>J.M. Long, A.M. Fan, Kunming Institute of Technology, Kunming, Yunnan, China</i>	
A Simple Method and Its Application to Predict the Cooling Curve at the Quenching Steel Part's Center	617
<i>J.M. Long, A.M. Fan, Kunming Institute of Technology, Kunming, Yunnan, China</i>	
Research on Comprehensive Quenching Effects of Refrigerating Fluidized Bed as Quenchant	623
<i>C. Xiao-nong, Jiangsu University of Science and Technology, Zhenjiang, Jiangsu, China</i>	
Controlling and Eliminating Distortion of Long Hollow Shafts by Laser Treatment	629
<i>P.-Z. Wang, G. Ding, J.-X. Qu, H.-S. Shao, China University of Mining & Technology, Beijing, China</i>	
The Stress-Hydrogen Corroding and Protecting with the Surface Hardening	633
<i>Z. Qinghua, Wuhan Institute of Textile Science and Technology, Hubei, China</i>
