

11th Mediterranean Conference on
Heat Treatment and Surface Engineering

International Conference on
Thermal Process Modeling and Simulation

LECCE • ITALY • 17-19 APRIL 2024

INDEX

HEAT TREATMENT OF IRON AND STEELS I

M4_009

Study of the effects of rapid tempering on 0.4 wt%C, Boron containing martensitic press hardening steel

M. E. Palmieri, L. Tricarico, M. Villa

TESTING & CHARACTERIZATION OF HEAT & SURFACE TREATED COMPONENTS

M4_018

Comparison of As Cast and T6 heat treatment on high end-of-life-scrap secondary aluminium alloy for High-Pressure Die Casting automotive structural components

A. Bongiovanni, A. Castellero, M. Da Silva

HEAT TREATMENT OF IRON AND STEELS II

M4_027

Effect of thermo-mechanical treatment on EUROFER97 steel properties

G. Stornelli, A. Di Schino, R. Montanari, A. Varone, C. Testani

M4_032

Strategic approaches to enhance quenching and partitioning applicability: optimizing mechanical properties and microstructure of commercial low-silicon 20MnB5 steel

M. Belfi, S. Barella, A. Gruttadauria, P. Cetto, T. Carrara

M4_002

Microstructural characterization of a novel Si,Al-based medium carbon steels treated by quenching & partitioning

M. Franceschi, L. Pezzato, M. Dabalà, A. Di Schino, G. Stornelli

MODELLING AND SIMULATION OF THERMAL PROCESSES AND SURFACE ENGINEERING I

T5_018

Kinetics of strain aging in grade EN 1.4003 ferritic stainless steel

T. Manninen, P. Peura

T5_002

Fixture hardening of aerospace gears: quenching and distortion analysis

H. Birkhofer, D. Münter, M. Vidoni, M. Jordan

T5_009

Thermo-fluid dynamic simulation of Hot Isostatic Pressure Quench (HIPQ) applied to aeronautical blades

P. Brambilla, L. Bucchieri, N. Gramegna, I. Mondino, M. Coppola, M. Sabella

T5_029

Induction heat treatment development based on simulation and its effects during fatigue testing

H. Torres, M. A. Delgado, O. Zapata, R. Colás

HEAT TREATMENT OF NON-FERROUS ALLOYS

M4_011

Impact of treatment time on single annealing thermal cycle performed on Ti-6Al-4V Titanium alloy specimens obtained using LPBF technology

E. Ferrari, S. Gaiani, M. Gozzi, M. T. Di Giovanni, M. Lassinantti Gualtieri, F. Mantovani, G. Ponzoni, P. Veronesi

SURFACE ENGINEERING I

M4_025

3D-printed 316 L stainless steel: optimization of low temperature plasma assisted carburizing

A. Palombi, R. Montanari, A. Varone, C. Verona, E. Bolli, S. Kaciulis, A. Mezzi, A. Lanzutti, F. Sordetti, E. Vaglio

M4_049

Optimizing release properties in injection moulding: comprehensive study of PVD coatings for biobased polymers

F. S. Gobber, D. Ugues, D. Battezzore, A. Frache, A. Berté, P. Civardi

MODELLING AND SIMULATION OF THERMAL PROCESSES AND SURFACE ENGINEERING II

T5_015

An integrated CFD-FEA approach for the service life extension of radiant tubes in galvanising plants

M. Bertoli, J. Ferino, A. Meleddu, M. Cocco, A. Ferraiuolo, S. Pantarotto

PHASE TRANSFORMATION & ALLOY DESIGN

T5_017

Dependence of the residual deformations on the inherent strain parameters for simulated additive manufacturing of MS1 and 316L steel parts

V. Gonda, I. Felde, R. Horváth, M. Réger, P. Varga

T5_013

Multi-scale modeling of aging of waspaloy superalloy: prediction of microstructure evolution and coupling with mechanical properties

B. Gövercin, C. Şimşir

SURFACE ENGINEERING II

M4_007

Thickness control of nitriding layer for creation of aluminum nitride powder for sintering

M. Okumiya, R. Sakaguchi, K. Nambu, M. Yoshida, J. Miyamoto

M4_034

Impact of different quenching medias and its parameters: salt bath quenching, gas quenching and oil quenching at different temperatures, on the part microstructure, hardening and geometrical distortion. Application to an automotive part in 16MC5 and 20MnB5, previously carbonitrided or carburized

V. Woimbee

M4_005

Recent progress in advanced plasma-assisted thermochemical treatments of steels

S. M. Jafarpour, A. Dalke, H. Biermann

DEFORMATION & RECRYSTALLIZATION

T5_006

Heterogeneous intragranular nucleation of ferrite in high strength low alloy steels

V. Colla, R. Valentini, M. De Sanctis, R. A. Ishak Nakhla, M. Castagnini

T5_012

Heat treatment guidelines of supermartensitic steel forgings by metallurgical modeling

E. Anelli, S. Colosio, P. E. Di Nunzio

T5_010

Digitizing heat treatment with DEFORM software

C. Viscardi

HEAT TREATMENT IN ADDITIVE MANUFACTURING I

M4_012

Additive manufacturing of carbide reinforced β titanium alloys for biomedical applications via in-situ alloying

A. Ayiotis, M. Bourrigault, Z. Pan, K. G. de Souza, W. Tsitsishvili, V. K. Nadimpalli, M.A.J. Somers, M. Villa, L. Emanuelli, M. Pellizzari, T. L. Christiansen

M4_046

On the impact toughness of heat-treated AISI 430 stainless steel fabricated by laser powder bed fusion

M. Merlin, C. Morales, A. Fortini, C. Soffritti, G. L. Garagnani

MELTING & CASTING

T5_016

Leakage of impregnated castings

M. Reger, R. Horvath, I. Felde, V. Gonda

HEAT TREATMENT IN ADDITIVE MANUFACTURING II

M4_023

Heat treatment effect on FeSi steel by Laser Powder Bed Fusion technology for ferromagnetic cores application

A. Di Schino, B. Ramiro Rodriguez-Vargas, G. Stornelli, R. Montanari, A. Varone, M. Sgambetterra

M4_016

Dilatometric study of the phase transformations in two different titanium alloys produced by Laser Powder Bed Fusion

L. Emanuelli, M. Pellizzari, D. Lonardi, L. Pasquini

M4_030

Characterization of AlCrN films deposited onto Selective Laser Melted Ti6Al4V substrates

E. Cerri, E. Ghio, G. Bolelli, A. Bertè, P. Colombi

ENVIRONMENTAL ASPECTS IN HEAT TREATMENT AND SURFACE ENGINEERING

M4_006

A comparison of modern vacuum furnaces designs for improved energy savings and CO₂-reduction

G. Valsecchi

M4_041

Austempering as a sustainable and efficient alternative to QT-Treatment in nitriding of heat-treatable steels - influence of different bainitic pretreatment structures on the nitriding response of EN42CrMo4 and EN31CrMoV9

S. Hoja, M. Brandt, M. Hunkel, R. Fechte-Heinen

M4_001

Modification of Diamond Like Carbon (DLC) to improve specific tribological characteristics for automotive applications

D. Romagnoli, F. Lavallo

M4_039

Innovative coating for Electroplated Hard Chromium replacement in severe environments

L. Fabiocchi, N. Lecis, K. Mounir

M4_042

A comparative study on Aluminum-Silicon coatings fabricated by ElectroSpark Deposition

G. Renna, P. Leo

ADDITIVE MANUFACTURING

T5_008

Microstructural simulation of components manufactured by SLM

A. Del Prete, T. Primo

T5_004

Layer-scale finite element model for laser powder bed fusion

M. Vanini, S. Saerle - B. Vrancken, K. Vanmeensel

RESIDUAL STRESS & DISTORTION

T5_028

Macro-segregations and their role in distortions in case-hardened ring gears

E. Stålnacke, A. Olofsson, J. Wendel, P. Holm

ARTIFICIAL INTELLIGENCE, PROCESS CONTROL AND RELIABILITY IN THERMAL PROCESSING AND SURFACE ENGINEERING

T5_020

Data-driven digital twin applied to brazing, additive manufacturing and welding

D. Stocchi, S. Tiberi, A. Chiarello, N. Gramegna, G. Borzi

POSTER SESSION

T5_030

Investigation of temperature conditions during friction of metal and polymer materials

R. Kohlhéb, M. Réger, R Horváth
